- This team is backed up by team of high skills and experience to deliver the best solution and services.
- We also provide personalized services in specific scenarios.
- It's a strong and confident network of team to provide excellence in services with maximum precision and maximized output.
- We have a dynamic engagement model that inherits based on optimization and faster output assuring aligned QoS and delivery.

1. EXECUTIVE SUMMARY

The Executive Summary should be written last after the remainder of the plan has been finished. It is an overview (with a suggested length of no more than one page) of the business, including the problem the business aims to solve, why this business' solution is different, the business' ideal customer, and the expected results. The Executive Summary should provide a high-level and optimistic description of the company.

If the business requires outside investment or external investors, include how much is needed, how it will be used, and how it will make the business more profitable. Think of this section as the first thing a potential investor reads, thus, it must capture their interest quickly.

Suggested headings to organize this business plan include the following.

- **Mantra:** Analyze, Identify, Advise, Execute
- **Mission:** Create relationships, not transactions
- **Solution:** Deliver with confidence and finish with precision
- **Market focus:** Technology from incubation to future, product or specific need
- **Competitive advantage:** Leveraging the harnessed intellect and experience across globe
- **Ownership:** We own and respect, we accept challenge and accomplish
- **Expected returns:** Assured delivery with value adds, and E2E satisfaction

2. COMPANY OVERVIEW

Welcome to @Large! The disruptive consulting organization. We are global organization consulting across domains and technologies. We provide E2E Technology, business and strategic solution. As our USP, we cater not only to larger corporate houses but we help startups and even the research projects. Our intent is to make the clear path for industrial growth with new dimensions ensuring precision and quality. Vast experience of our advisory team will cater at best ensuring the answers to all the issues and gaps. Welcome to our arena of new age consulting!

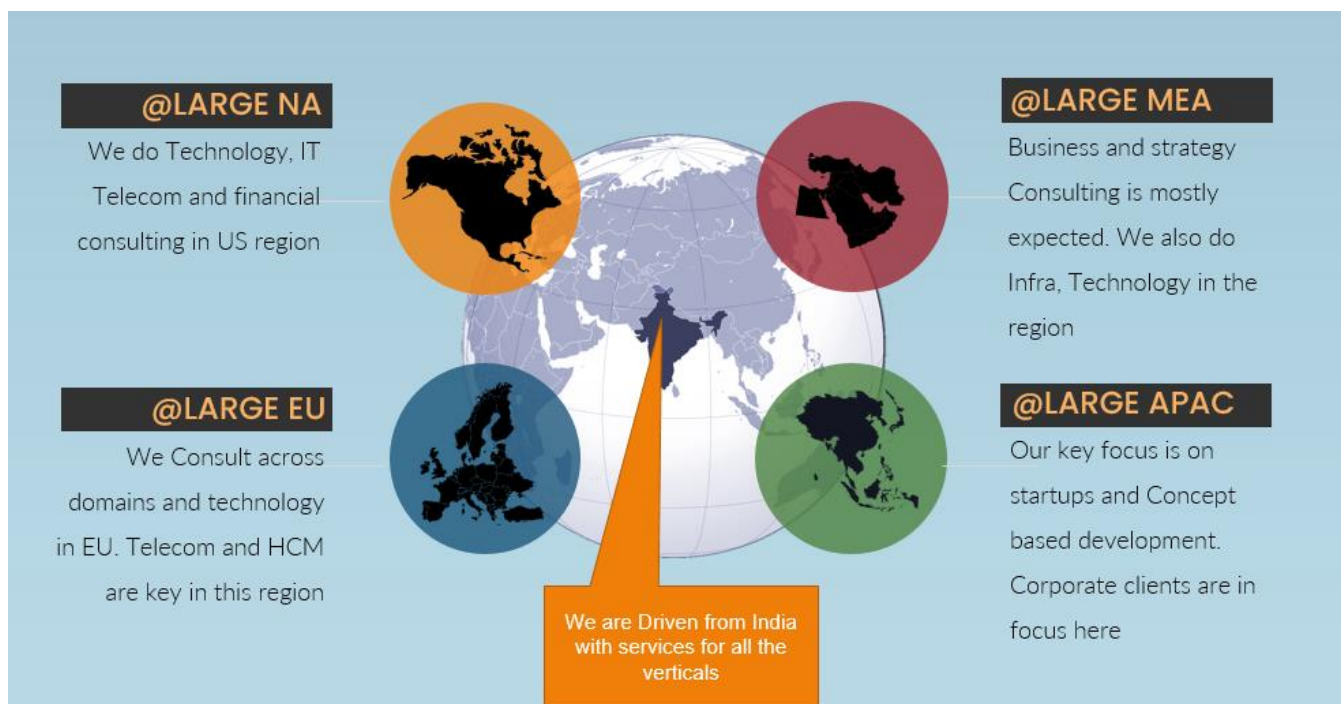

We are a global company having presence across globe. Our consultants are with higher excellence and we enable them with efficient teams to deliver. We cater SMEs to large corporate houses with confidence. So, reach us if you have any new plans or concepts to be enterprising. We are your extended arm or your best partner to help you in establishing your organization end to end or for specific needs. Just call us or write to us and we will be with you. We have core strength in Technology and Digital transformation projects.

- Company Strength:** Our strength is our advisors in front with a strong delivery team supporting them. It's always a cost effective model with which you will see the valuable outcome. We quantify our deliverables using several Ai and analytical tools. We work as partners, not as transactional relationships. Its IT or cloud or Digital transformation, we will ensure you have the right and cost effective solution.
- Mission statement:** Our mission is to create the largest consulting network that works in transparency to provide best and cost effective services model for every one
- Company history:** We are here to create the history, we are the oldest young organization globally having centuries of experience from history, working on present needs catering startups to corporate houses preparing for future. We are reliable, transparent and value adders.
- Markets and services:** Our global advisors network strengthen us to make us working 24x7 globally. We address technical, business, strategy and much more across domain and industries

- **Operational structure:** Our operations are more of a transparency model matured after longer research putting us step ahead of the conventional consulting or service model. We download benefits to our associates and the customer directly in real time.
- **Financial goals:** Create a best model to endowment direct benefits of the most sustainable model disrupting and each stage. We believe in sharing with transparency. We will be a growth model in next 3 years!
- **Our Presence:** We have presence across globe. Reach us if you want to know more details.

3. TELECOM @LARGE

Undoubtedly technology consulting is very vast! We have a large team of technocrats in advisory. Thanks to Science and engineering we are in techno-age!

Transformation of organization accepting the new technology is mandatory and almost every industry is doing the same. We have domain specific technocrats who understand the miles view to the micro level. Be it software or hardware, we have experts to put best and futuristic changes to your needs. Industry 4.0 is IOT implementations automate the systems up to 70% reducing downtime and providing predictability of expansion aligning to marketing demands and customization based on customer needs. We take consulting specific to technology and we also take executions like; migration, upgrades, technology transfer, ERP, application development, Ai or analytical tools, Integration or E2E technology transformation.

@Large anticipates that 5G will transform the world of business communications, and as such has built their application with team messaging and conferencing capabilities designed to be 5G compatible.

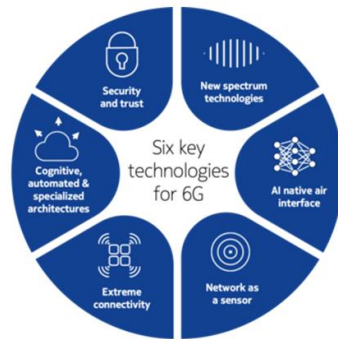

We undertake 5G SI, Testing, OSS/ BSS integration and platform implementation, managed Services with DevOps and Operational management services. With process of integrating both virtual and physical components of any enterprise with new upgraded systems or applications to work over the new 5G network. Rising demand for high-speed bandwidth capacity has enabled enterprises to install upgraded network infrastructure to enhance overall operational efficiency as well as reduce the total process costs. Thus, robust deployment of upgraded network infrastructure across enterprises to deliver enhanced services to their customers is estimated to propel the demand for 5G system integration services.

Every legacy enterprise have to aggressively focus on integration the next gen network for various business and compatibility concerns. We provide cross domain experts to make the cost effective integration addressing all the possible challenges.

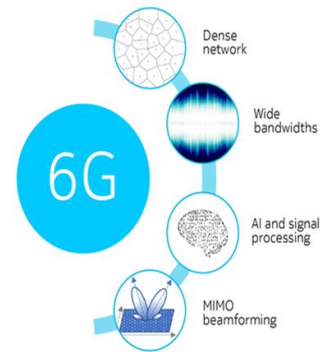

- **Telecommunication and IOT:** Our core strength is of having strong advisory directors having complete experience of Telecom life globally from 2G to 5G/ 5G Advance or 6G and beyond. Few highlights of experience are:
 - SDN/ NFV, Network Slicing, IOT-5G, Virtualization,
 - O-RAN, Self-organized RAN, LTE-RAN, SkyRAN, SON etc
 - IoT platform, App Management, Development, Integration
 - AEP, CMP, Service orchestration, Billing, BSS integration.

- Cloud + 5G + Ai + IoT Solutions and transformation
 - Hybrid or heterogeneous cloud for inheritable service.
 - Technology experts of Huawei, Ericsson, Juniper etc
 - Research and Development projects on 5G/ 6G etc.
 - And Much More! Please ask....
- **Product Development:** We also undertake product development projects from the concept to business solution having innovation at every stage.
